SUMMARY

Software Engineering student at Eastern Mediterranean University (full scholarship, expected Jan 2028) writing gameplay code in C++ (Unreal Engine) and C# (Unity) since 2021. Released 3 PC games, wrote the core mechanics of a 48-hour game jam entry in a 3-person team and is building a roguelike card game solo for PC and WebGL. Works with AI-assisted tooling (Claude Code, MCP for Unity) in daily development.

EXPERIENCE

Game Developer | **CaveMans (Indie Studio)**, *Kayseri, Turkey* *Jan 2021 – Jan 2022*

- Released 3 PC games on itch.io (2 in Unreal Engine with C++, 1 in Unity with C#): Ratio Errorem Gladius, AstroTest and There Is No Light (Atom Game Jam entry).
- Implemented gameplay systems in C++ (Unreal Engine) and C# (Unity) using event systems, collision handling and scene management.
- Delivered playable builds from first prototype to release, owning mechanics, level design and UI under 48-hour jam deadlines.

GAME PROJECTS

KUT | Roguelike card game | Unity, C#, WebGL | Plursus *Oct 2026 – Present*

- Programmed a Balatro-style scoring roguelike built on the classic tile game Amerikano, solo in Unity and C# for PC and WebGL.
- Implemented the ledger penalty system, where leftover cards accumulate toward a loss limit, plus daily seeded runs and spendable credit.
- Designed rule-bending character abilities (card swaps with the rival, point theft) as modular effects over base scoring.

İstanbul Afet Bölgesi | Civil Game Jam 2026 (48 hours) | Unity 6, C# *Oct 2026*

- Wrote the core gameplay mechanics as the programmer in a 3-person team (artist, story designer), shipping a 2.5D isometric Windows build in 48 hours.
- Implemented a choice-driven escape flow from the 6th floor of an apartment with escalating quake events and emergency alerts.

GameMate | Mobile matchmaking app for gamers | React Native, Expo, Zustand *2025 – Present*

- Building a cross-platform app that pairs gamers through a swipe interface with mentor, mentee and duo roles, with a character creator of 300+ modular assets.

DamacanaBreak | Meta-horror farming game | Unity 6 (2D), C# *2026 – Present*

- Developing a 2D farming game that turns into meta-horror with fake crashes and fourth-wall breaks; automates Unity scene and object setup through Claude Code with MCP for Unity.

LEADERSHIP AND COMMUNITY

Field and Communications Team Member | **GDND, EMU Game Development Club** *Oct 2026 – Present*

- Booked 2 industry speakers for the Dev.Mind webinar series (Oct 2026): Berk Savi (Ancyra Studio) on studio building, Serhat Uzun (Rock Paper Publisher) on indie publishing.

Co-Organizer | **GDG on Campus EMU** *2026 – Present*

- Wrote the chapter's academic-year plan: team roster, role assignments, 50+ categorized event ideas, month-by-month calendar.

Board Member, Corporate Relations | **EMU IE Club** *Jan 2025 – 2026*

- Built the documentation and reporting system for the club's Mentor-Mentee programme, tracking member and company relationships across all active partnerships.
- Served as the contact between company representatives and club leadership at university and industry events, and led the team behind a club-wide engagement event.

EDUCATION

B.Sc. Software Engineering | **Eastern Mediterranean University**, *Famagusta, Northern Cyprus* *Expected Jan 2028*
Full Academic Scholarship | Coursework: OOP (Java), Operating Systems, Numerical Analysis, Digital Logic

SKILLS AND CERTIFICATIONS

Programming: C++, C#, C, Java, JavaScript, React Native, Expo, Zustand
Game Engines: Unreal Engine, Unity 6, Godot
Game Development: Gameplay Programming, Event Systems, Collision Handling, Scene Management, Prototyping, Level Design, UI
Tools: Git, GitHub, Blender, Aseprite, FL Studio, Linux command line, Claude Code, MCP for Unity
Languages: English (C1, fluent), Turkish (native)
Certifications: Intro to Digital Game Development with Unity, Hypercasual Game Fundamentals, C Programming (all Jan 2024)
